

 *The beginning of every good project...*

# BROCHURE GM 2024

# +24 YEARS

PROVIDING THE BEST  
SPECIALIZED SERVICES  
OF DIGITAL MAPPING AND  
GEOMATICS

# TOPOGRAPHY SERVICE

This service carries out large-scale Topographic Surveys, where the topographic plan of surfaces and/or structures is obtained with high planimetric, altimetric and volumetric precision, for the development of basic engineering, detailed engineering, geological and geophysical studies, geometric design of roads. , tunnels, dams, DMEs.

Likewise, they carry out dam monitoring activities, bathymetric surveying, measurement of drilling collars, 3D scanning of shafts, tunnel chimneys and establishment of geodetic networks by differential method.

Through our technology and specialized personnel we obtain products with high precision, image quality, speed and security, to meet the requirements and satisfaction of our customers.

## Applications:

- ✔ Surveys of natural lands.
- ✔ Development of basic engineering, conceptual engineering, and detailed engineering.
- ✔ Lifting of drilling collars.
- ✔ Geodetic networks.
- ✔ Rethinking.
- ✔ Monitoring of Dams and Dams

We represent the terrain in 3 dimensions, through measurements with high precision and speed equipment such as:

- ✔ 1" total stations.
- ✔ Long-range Terrestrial Laser Scanner.
- ✔ Differential GPS and RTK system.
- ✔ Latest generation software.
- ✔ RPAS (Drone) with personnel certified by the MTC.
- ✔ EUSV Apache 4 in hydrographic survey projects.

# QUALITY, SAFETY, OCCUPATIONAL HEALTH AND ENVIRONMENT POLICY

We are a company dedicated to providing solutions digital cartography, aimed at meeting the requirements of our clients, achieving levels of precision that ensure your trust.

With a view to being sustainable over time, we prioritize the safety and health of our collaborators and carry out our operations in a non-invasive and environmentally responsible manner, committing to:

- ☑ Provide safe and healthy working conditions, encouraging the participation and consultation of staff and their representatives, and generating a culture of prevention of occupational risks, thus avoiding injuries and deterioration of health of our collaborators.

- ☑ Identify and eliminate hazards to the extent possible and reduce the risks to which our employees are exposed. collaborators.
- ☑ Work with highly trained professionals and cutting-edge technology to reduce the exposure and risk of personnel, as well as the environmental impacts that could be generated.
- ☑ Comply with legal requirements, technical standards and applicable standards of Quality, Safety, Health Occupational and Environmental Care.
- ☑ Protect the environment by identifying, evaluating and minimizing the environmental impacts produced by our operations, preventing pollution and impact on biodiversity and ecosystems in our labors.
- ☑ Continuously improve our management system, in order to optimize our environmental performance, strengthen the prevention of the safety and health of workers and the effectiveness of our processes.

## Certifications:

Scope of ISO 9001:2015 Certification  
"Geomatics, Topography, Photogrammetry, LiDAR, Assignment of Topographic Crews for Project Supervision"

# OUR VALUES

## TECHNOLOGY

Innovation in each of the processes of our services for the optimal development of projects.

## QUALITY AND PRECISION

Develop each project with the highest quality standards in accordance with local and international technical standards.

## TRUST

Commitment and confidentiality in the execution of projects for the full satisfaction of our clients.
